

Deuxclair®

Micro Aqua Jet cleansing & Rejuvenation
System for glowing and radiant skin

For official use only

FDA CE

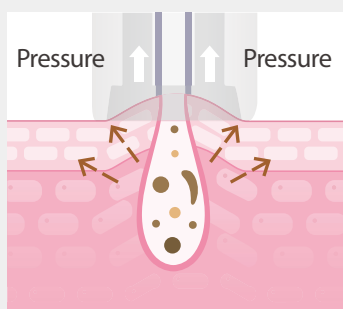

Overwhelming technology

The Deuxclair Vacuuming System gently lifts the surface layer of the skin by using micro suction tip/point. This specially designed hand-piece will extend and open the pores for cleansing. The device will start to move in a very rapid synchronized motion without damaging the resilience of the pores. The Ultra-fine water Jet-stream uses 'Hydro water fractional system' to accelerate fine stream of water into the pores to clean and tighten the pores. This painless and non-invasive treatment will bring you outstanding results. It helps to remove any pore residue, tightens the pores and brings out the best results of natural skin regeneration.

Water jet system

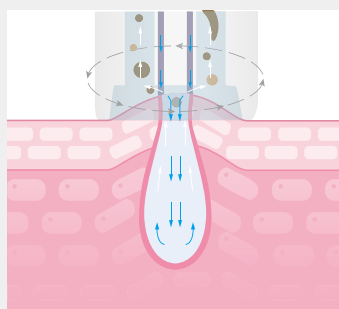

Deuxclair helps to enhance autoimmune system which is designed to rejuvenate and strengthen the outer layer of the skin and protect its barrier with the less procedure time. Deuxclair is the new concept of treatment for pore tightening, wrinkle reduction and skin brightening using 'Hydro water fractional system' and 'Hydro water delivery system'. Deuxclair water jet system is an advanced dermatological device which uses pressurized water device to release fine jet of sterile water to cleanse and exfoliate the skin. The process helps to naturally rejuvenate and regenerate your skin without damage the surface.

The steps of Deuxclair procedure

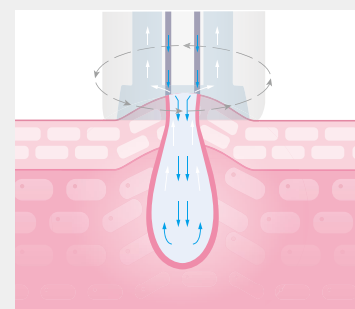

Step 1.

The vacuum-based tip gently lifts the surface layer of the skin to open the pores for cleansing.

Step 2.

The fine jet of sterile water is released by the pressurized tip in a synchronized motion to thoroughly wash out any residue left in the pores.

Step 3.

The tip rotates 360 degrees while lifting and cleansing in a synchronized motion. The deep cleansing action removes residue from the pores thoroughly.

What is Water Jet Cleansing System?

The Micro Aqua Jet System is a relaxing painless device aimed to improve skin's clarity and pore resilience. The Deuxclair technology uses pressurized suction tip which opens the pores. The tip is combined with the water jet which releases fine stream of water in a rapid manner. The sterilized micro stream of water is projected into the pores for thorough cleansing of the pores.

This painless device helps to cleanse and exfoliate the skin, improve clarity of the skin, brings glow, rejuvenates and helps tone the skin. This treatment helps to unclog your pores and removes any residue from your skin. This device can be used on face and your scalps as well.

Pre-treatment and Main treatment

Diverse type of treatments' beginning, can be covered by Deuxclair.

Deuxclair is one of the main devices, however, it can collaborate with other main devices and support them as pre-treatment to maximize the efficacy.

The clean and neat skin by Deuxclair can absorb the efficacy of treatments perfectly.

This Deuxclair Water Jet System Device is designed and inspected by doctors with utmost safety and efficacy in mind.

What can be expected from Water Jet Cleansing System?

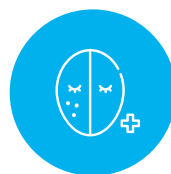

Improve the resilience of the pores

Helps rejuvenate your skin

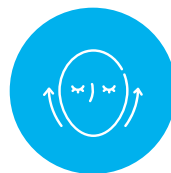

Cleanse and exfoliate the skin thoroughly

Refine the tone of the skin

Brings glow and radiance

Wrinkle reduction

The technology of Water jet System

The Duexclair treatment uses its specialized vacuum-based water jet device to unclog the pores and cleanse any residue that was collected over time. The high-speed water jet which rotates in a circular motion simultaneously, provides deep clean of the pores and extract any impurities left inside. The machine and the specially designed hand-piece is patent protected and approved by FDA. The result of this amazing device is outstanding and your skin will look refined and polished.

Deuxclair scalp scaling

This deep scalp scaling system cleanses your scalp and exfoliate to help remove dead skin cells, unclog the pores on your scalp and wash away any product buildup from your scalp. Our new specialized device is designed to help to re-balance your scalp condition.

This scalp-soothing process using sterilized water helps to calm and cools your scalp.
